

IMPROV WORKSHOPS WITH KLAUS PETER SCHREINER INTERACTION, INSPIRATION, EMOTION...

**Workshop for young people (6 to 12 hours):
school children, university students, youth groups**

Improvisation Theatre And Social Skills

This workshop makes young people familiar with basic improvisation techniques. They will learn to apply ground rules and simple tricks to create little scenes and stories together. How can we create a story from scratch? How can we deal with unexpected situations? How can we communicate cooperatively? What can being attentive and being there for each other contribute to healthy relations? What improv games and formats can we use to entertain friends?

This workshop can be shaped for any ages and abilities - no previous drama skills required. The improvisation games and exercises are not only good fun but they also foster teamwork and help you lose your inhibitions of speaking in front of people. They will be practised in a highly motivational atmosphere encouraging young people to explore their storytelling and their social skills. A part of the workshop could be putting on a show for friends or fellow students.

Klaus has for many years been teaching improv in Germany, Austria and more recently in Britain. He has studied under international masters like Keith Johnstone, with whom he has collaborated as a workshop interpreter in Germany. Klaus is fascinated by the magic of human interaction both on and off the stage and the process of creating stories, both of which he continues to explore in his workshops emphasising fun, creativity and encouragement.

Examples of Klaus' most popular workshops:

For improv groups: Truthfulness In Improv, Short Form Storytelling,
Musical Improvisation, Improv Basics

For theatre groups: Improvisation Techniques For The Stage

For schools: Improvisation And Creativity

For businesses: Corporate Improv
